Processing time **28 days**

Producer code **DCBR1J**

### Product description

Ominous rumours have been heard about this abandoned toy store at the end of the Brownstone Row... will you dare to enter?

Part of the Dark City line, Brownstone Row will feature several brick & brownstone apartment buildings, small business venues and public service buildings, all using a selection of pieces and architectural solutions that allow you to mix and match these kits, giving you even more options for customizing your table!

- all kits with the same number in the name are compatible with each other - grab a floor from Brownstone Row 1B and use it to extend the height of Brownstone Row 1A!
- turn over the floor piece and choose where the staircase will go
- swap the side walls with each other and decide where to put the side window; choose where to put basement windows, ventilation shafts and similar wall detail pieces

The kit contains one (1) modular apartment/commercial building with two accessible floors, removable roof and two set of opening doors. One sheet of HobbyGlass (clear) is included to make the glass panes for the windows.

The model comes unassembled and unpainted. Pulp City miniature shown for scale purposes only.

Instructions available soon in the "Download" tab.

Measurements:

L: 186mm H: 174mm, W: 126mm
