Product description

Forges of Prometheus is an innovative range of modular sci-fi/industrial terrain dedicated for 28-35mm miniatures, using the OneUp modular terrain system. After assembling the modules from a given set, you can arrange them in any way you like, take them apart for storage or transport and combine with any other OneUp set, either from Forges of Prometheus or other OneUp ranges.

Stack the pillars, arches, and cylinders as high as you want to, connect them with beams – and add walkways or platforms on top of that to get a great looking multi-level scenery. Use ladders and stairs to get between levels, hide behind railings, use the decorative pieces like hatches or computer consoles as objectives... the Forges of Prometheus await!

Models come unassembled and unpainted. All miniatures shown for scale references only.

The kit contains 35 modules:

- 3x 100mm cylinder
- 1x 125mm platform w/five holes
- 2x 100mm cylinder cap (platform)
- 2x 50mm cylinder cap (hatch)
- 1x pillar cap (vent)
- 2x 50x125mm walkway
- 2x 150mm beam
- 3x ladder (single)
- 3x pillar decoration (fans)
- 6x pillar decoration (piping)
- 4x 50mm railing
- 6x 75mm railing
