Vault Corridor C

Price	14.95 Euro
Availability	Made to Order
Processing time	28 days
Number	WLV023
Producer code	WLV023

Product description

Vault Builder, part of The Wasted Land series, is a fantastic new range of modular scenery based on the OneUp system. Each kit comes with a variety of modules that can be quickly rearranged for each game: extend the walls, change their direction, place the doorways wherever you see fit. And after the game? Take it all apart for storage, a set of walls enough for a full 90x90 table will easily fit into a single shoebox! Hidden connections assure that your vault walls will remain steady during the game, while the included decorative modules allow you to personalize your terrain with some additional bits.

All the OneUp modules are compatible with other OneUp ranges (e.g. Forges of Prometheus).

Models come unassembled and unpainted. Any miniatures shown for scale purposes only.

Assembly instructions available in the "Downloads" tab.

Contents:
